Set 8 Photography
Component 1 8206/C

Overview of work

This Component 1 submission shows evidence of a sustained project on the theme of 'Fragments', and two shorter projects, one entitled 'Cover, Mask, Conceal, Hide', and the other 'Liverpool'. Further work shows annotation and practical experimentation in response to the study of a number of contemporary photographers.

The investigation and experimentations throughout often focus on the physical manipulation of photographic images, combining portraiture with experimental imagery. A wide range of material has been used to experiment within the media of photography. The student has also explored both the natural and urban environment as sources.

Assessment objective 1: 16/24 marks

After some initial experiments with camera technique the sketchbook shows how the student responds to the work of other photographers by producing a number of initial photographic responses. These demonstrate a visual understanding of the source. A project on the theme of 'Fragments' prompts the collection of relevant sources selected for their usefulness in exploring key words appropriate to this broad theme, such as 'shatter', 'tear', 'smash' and 'rip'.

Throughout the work book the student makes many initial and purposeful photographic responses to the work of a range of photographers. These convincingly demonstrate an understanding which goes beyond the notion of copying and have links which can be detected in the future development of ideas.

The work **convincingly** meets the criteria in the 13 to 16 mark band.

Assessment objective 2: 16/24 marks

On almost every page of the work book the student produces experimentation. This often involves the physical manipulation of the photographic image, for example through stitching, collaging, using scratched marks, cutting and reassembling. Many of these techniques are used in combination as the journey continues.

In the 'Fragments' project, purposeful refinement can be seen in the choices and variations documented in the work book which ultimately lead to the production of a final selection of carefully produced and mounted images.

The variety of experimentation and range of appropriately selected media is a strength in this submission and its purposeful nature is underlined by links to the wide range of inspirational sources. There is a convincingly consistent ability to explore and experiment with materials and ideas related to the source material.

The work **convincingly** meets the criteria in the 13 to 16 mark band.

Assessment objective 3: 15/24 marks

The recording of ideas related to the manipulation of the image is presented regularly and clearly throughout the work book. The final selection of prints display the student's most refined versions. The majority of written annotation is descriptive of the making process and of decisions made by the student. The recording of insights and ideas through written annotation is brief, but occurs in the project on 'Disguise' as part of the student's reflection on the suitability of images from a photo shoot. This is also evident in written comments about the use of materials in the final collection of stitched and painted photographs.

Many of the images are altered through the process of graphic mark-making and stitching on to and into the surface of the photograph.

The recording of observations through photography is consistent. The range of camera control is consistently skilful, as is the recording of experimental ideas and selection of appropriate materials.

The work **clearly** meets the criteria in the 13 to 16 mark band.

Assessment objective 4: 16/24 marks

Throughout the submission the student makes meaningful visual connections with sources that go beyond pastiche. As the projects and the student's creative journey develop, the evidence shows a synthesis of ideas from many different sources. This, together with the continued combination of materials and techniques, demonstrates both a consistent level of meaningful understanding of visual language and the personal nature of the student's response.

Whilst the selected and mounted prints illustrate the ability of the student to realise their intentions, the experimental work produced in response to the selected photographers in other parts of the work book, are also testimony to this aspect of the student's ability.

The student's ability to present a personal and meaningful response that realises intentions is convincingly consistent.

The work **convincingly** meets the criteria in the 13 to 16 mark band.

Total: 63/96 marks

DOUG AITKIN

MY EXPERIMENT

He takes four pictures and puts them together to make one big picture.
Doug Aitkin uses Photography, sculpture and architecture.

Doug Aitkin was born in Redondo Beach, California in 1968. He works and lives in venice California and New york. He is an American multimedia artist. My work is Linked to the artist because I have got four pictures and stuck them together to make one picture. They are pictures to do with inside outside.

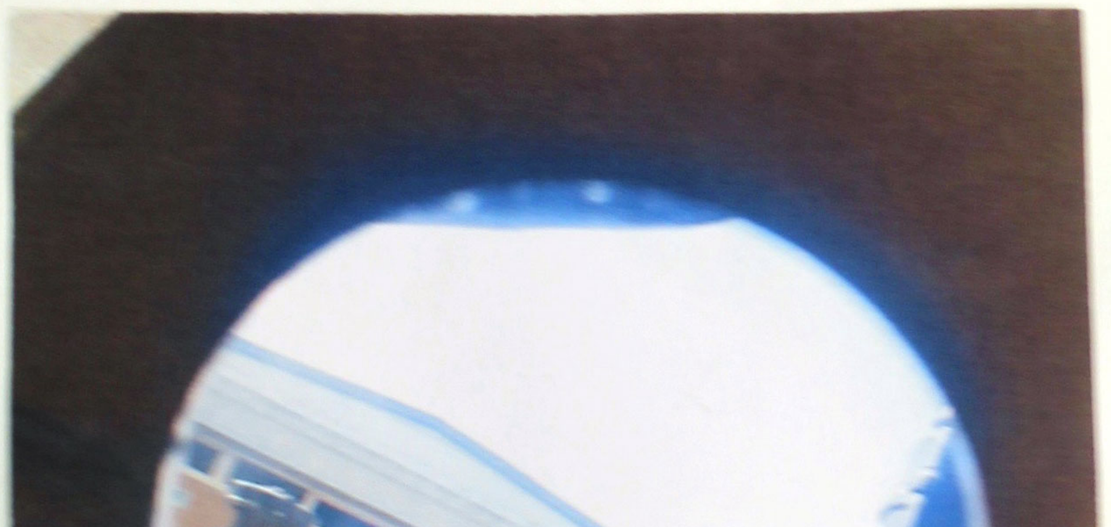
this isn't very good because you can't see anything and the reflection is too bright

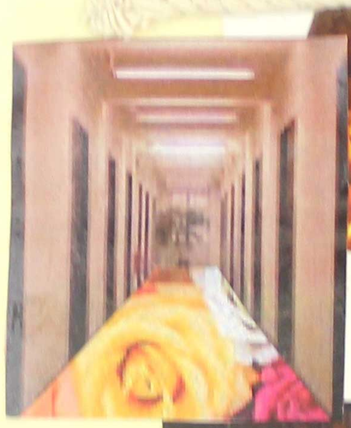
my experiment



Anna Schuleit was born in 1974, in Mainz Germany. She is a visual artist who lives and works in the United States.

FLOWERS

These Pictures relate to the theme inside outside because she has put an outside object (flowers) into a room.



My work is linked to the artist because I have got a Picture of flowers and put it on the floor of a corridor like Anna does.

Final farewell for Adrian, 51

THE funeral takes place tomorrow of a company boss found dead at his business headquarters.

The body of Adrian Barker was found at his ACB Hydraulics crane company in Cheadle, earlier this month.

The 51-year-old, who lived in Foxt with wife Sue, died just 12 days after ACB Hydraulics [illegible]orker Joseph Harrison, of [illegible]ongleton, died in an [illegible]ndustrial accident at the [illegible]rm.

Staffordshire Police are not [illegible]eating Mr Barker's death as [illegible]uspicious and have prepared [illegible] report for North [illegible]affordshire coroner Ian [illegible]mith.

His funeral takes place at St [illegible]verburgh's Church, in [illegible]ingsley, at 12.15pm [illegible]omorrow.

A joint police and Health [illegible]nd Safety Executive [illegible]nvestigation is continuing [illegible]nto Mr Harrison's death.

To pay your respects to Mr [illegible]arker, email tributes@[illegible]hesentinel.co.uk.

the bodies of two "Talibs" had been brought in, killed in battle when they had attacked the poppy eradication operation. When I inspected the bodies it appeared, from the state of their hands, that they'd been involved in agriculture all their lives. Their clothes were opium-stained and their one-shot rifles ancient. One had been run over rather than shot.

I heard of the "wrong" people being killed several times, and this was almost always the result of poor intelligence or people using the coalition to settle their feuds. Once two US soldiers had been killed by a bomb. Shortly after, a Helmandi I knew told me that the bomb's components had been stored at another man's house. It transpired that this man was a
